

Unified communications for the education sector.

Take your phone system to the next level with the CallSwitch Unified Communications platform.

Our hosted solution delivers a powerful suite of collaboration tools, third party integrations, and hardware options that mobilise teachers in an affordable, efficient way, while offering school administrators a simple way to perform a wide range of management duties from anywhere.

Enhanced collaboration

CallSwitch is more than just a phone system, combining voice, video, instant messaging, call recording, online meetings, directory services, and more to support remote learning, resource sharing and faculty collaboration, with everything accessible from a single platform.

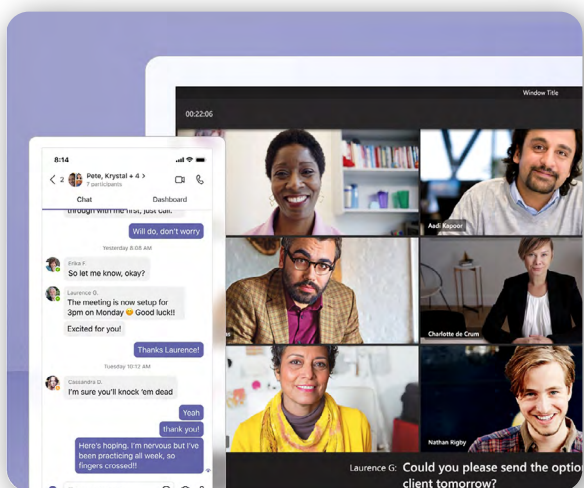

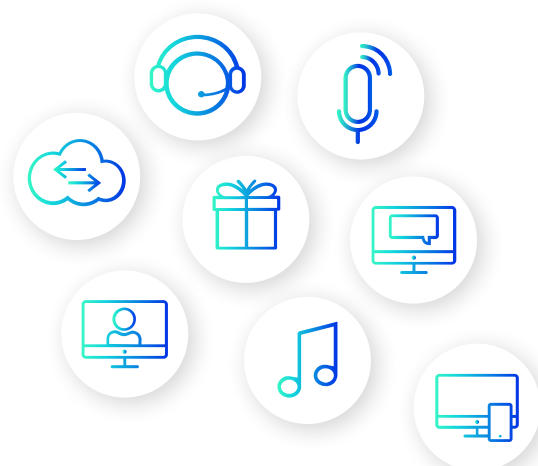

Built for modern learning

CallSwitch is designed for use in the classroom, school office environments, or even from home. We support all leading desk phone manufacturers, and provide free apps and web browser access, allowing teachers to use their communications channels anywhere, on desktop or mobile.

Advanced features

CallSwitch delivers advanced telephony functionality including auto attendant, intelligent routing, on-hold music and call recording, collaboration tools including voice and video conferencing, chat, screen and file sharing, and presence, offering inclusive call bundles with unlimited free calling between extensions.

Microsoft Teams integration

If your school is currently using Microsoft Teams to support remote learning and collaboration, CallSwitch integrates seamlessly, so you benefit from our telephony features, generous call bundles, and UK based support, improving your system resilience, while delivering cost savings.

Simple online management

Our web-based portal enables you to perform administrative duties from anywhere. Add new users instantly or change call routing between term times or holidays and much more., without special training, with inbuilt security that supports student safeguarding.
